

## Product

## Description

- BLUMOTION soft close system for doors with Blum hinges
- Installs into end panel (left) or with various adapter plates
- Lifetime guarantee

## Application

## End panel installation

## Adapter plate mounting

+

## Assembly Aids

## Mounting positions

For cabinet height up to 24"

BLUMOTION for doors is fine tuned for Blum hinges. The perfect motion, smooth and silent, can only be guaranteed with Blum hinges.

In most applications one BLUMOTION is sufficient. For heavier or taller doors the use of two BLUMOTION devices may be necessary.

## Mounting with BLUMOTION drilling template

For a discreet look, BLUMOTION may be bored directly into the end panel of the cabinet.

Blum also has various BLUMOTION adapter plates for applications including double doors, 32mm line boring, and face frame.
