

blum[®] Compact 33 Hinges 110°

Minimum Reveal Table In Millimeters

B	T	16	18	19
2.5	3	3	3.8	4.5
3	3	3	3.8	4.5

B= boring distance
T= door thickness

For doors thicker than 19mm (¾") or doors with profiled edges, a trial is recommended.

(OL)	AS	DP
¼"	1 ½"	½"
½"	7/8"	¼"
5/8"	¾"	1/8"
¾"	5/8"	0
1"	¾"	0
1 ½"	¼"	0
1 ¼"	1/8"	0
1 3/8"	3/16"	0
1 ½"	3/16"	0
1 5/8"	3/16"	0

OL - Overlay
AS - Arm side protrusion
DP - Door protrusion
Cup depth - 13mm
Boring distance - 2.5 - 3 mm

Side Adjustment

Loosen screw on hinge arm and adjust door to desired position; tighten screw + 0, -3 (1/8").

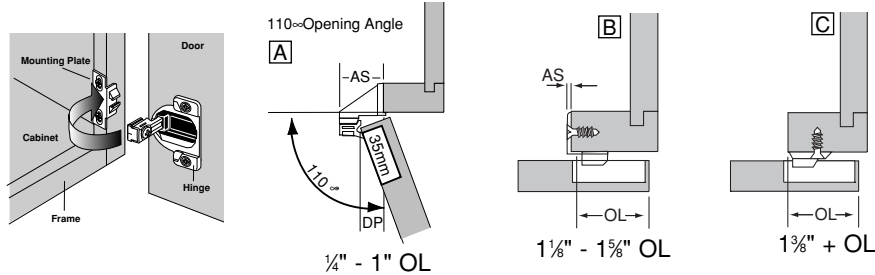

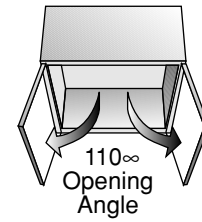

Side adjustments are possible on COMPACT 33 hinges only.

Height Adjustment

Loosen screws on all mounting plates, adjust door and retighten screws +/- 3.5 (3/4")

Height adjustments are possible on COMPACT hinges.

The ideal solution for traditional face-frame cabinets. The COMPACT series is specifically designed to offer makers of the frame cabinets the advantages of concealed hinges. Various door overlays are achieved by slide-on mounting of COMPACT 33 series 110° hinge to one of a variety of mounting plates.

Order 2 hinges and 2 mounting plates per door.

Self-Closing

COMPACT 33 Hinges
